

Date: _____ Name: _____

Can you double numbers?

We would like you to explore numbers and doubling with an adult. Being able to count and add is an important life skill. When doubling explain to your child it is adding the same number together. Encourage them to use their fingers to show the doubles and adding them together. For example: $2 + 2 = 4$

For this activity you need a dice! Roll the dice, count the dots to see how many and then double the number.

For example: if your child rolled

they would count 1, 2, 3 then say $3 + 3 = 6$

Dear Parents,

Please complete the following questions with your child and return the sheet to school.

1. Can you count the dots correctly on the dice? (*tick or cross*)

2. Can you double each number? Can you write the addition sum?

number	What is double the number?	Can you write the sum?
1		
2		
3		
4		
5		
6		

3. Did you enjoy this activity? (*Please circle*)

Yes No Why? _____
